Transform Your Space with Lighting That Defines *Every* Moment

Lighting plays a key role in any space, indoors and out. For most of us, it is the first element we *feel*. It defines the intent of the space: for recreation, entertainment, relaxation or work. Key elements to consider:

LIGHTING
FIXTURES

AUTOMATED
SHADES

CONTROL
SYSTEMS

Steps to Integrated Lighting Success

01

Assess Scope

Define the project's scale and establish a budget that aligns with your vision and needs

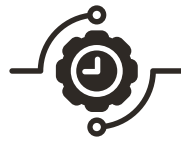

02

Determine Team

Identify project goals and bring together the key experts for a seamless design process.

03

Create Task List

Set a clear timeline and outline each step to keep the project on track.

04

Implementation

Execute the plan with precise coordination and closely monitor for quality and accuracy.

05

Ongoing Support

Ensure long-term performance with continuous support and assistance post-installation.

Who Benefits from the Integrated Lighting Program?

Architect: Coordination, RCP, fixture schedule and wiring plan, including tape lighting in millwork and colored effects lighting. Product testing as required.

Builder: Direct support to ensure an efficient and accurate process in all phases of the construction. Coordination by lighting specialist, shade specialist and project manager.

Homeowner: A superior final result and downstream support.

Electrician: Supported with comprehensive lighting plans, installation details, and on-site project management. Our master electricians speak their language.

Landscape Architect: Design support, conduit map, fixture schedule of exterior lighting, integration with interior lighting control.

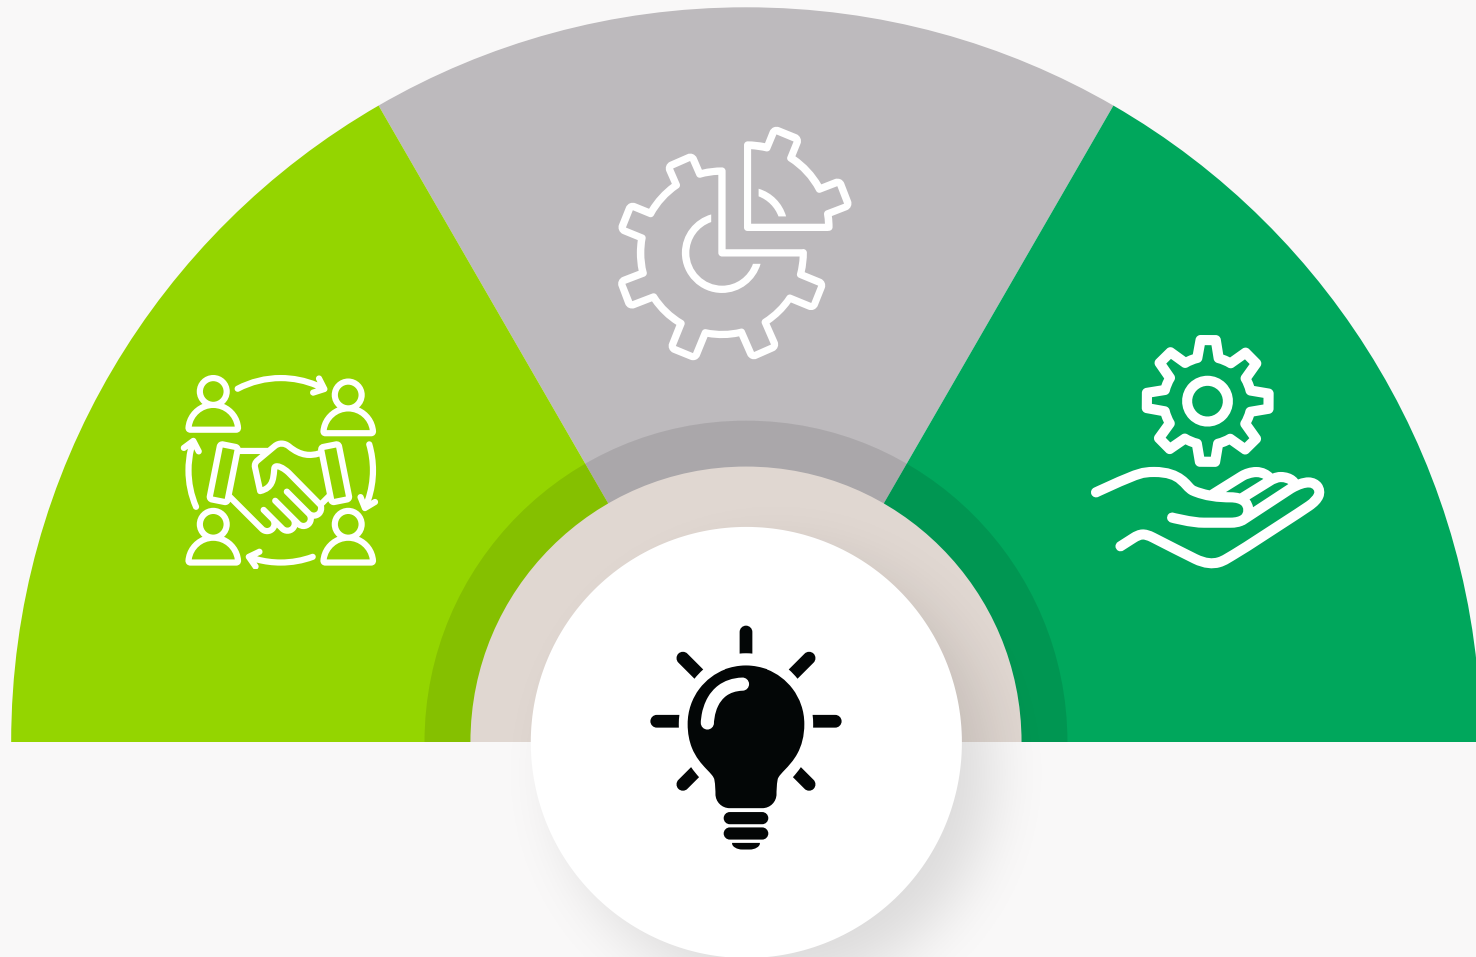

Lighting Designer: Provide design support by matching controls to luminaires, deferring to Certified Lighting Consultant for fixture specifications when involved.

Interior Designer: Highlight the room, the furnishing and the art the way they're envisioned with a cohesive approach and automated scene control; minimize furniture fading.

INTEGRATED LIGHTING PROGRAM

What Sets SimpleHome Apart?

01 COLLOBRATIVE PROCESS

We bring together experts to create a seamless lighting experience.

02 INTEGRATION EXPERTISE

Our team combines lighting, shading, and control systems for complete cohesion.

03 ONGOING SUPPORT

We provide continued assistance to ensure your lighting system performs flawlessly.
